

European Journal of Combinatorics Contents, Volume 24

Number 1

Publisher's Note	1
HENNECART, F. and PLAGNE, A., On the subgroup generated by a small doubling binary set	5
VINCE, A., Graph recurrence	15
TANIMOTO, S., A study of Eulerian numbers by means of an operator on permutations	33
SHIKARE, M.M. and AZADI, G., Determination of the bases of a splitting matroid	45
CHANG, G.J. and LU, C., Distance-two labelings of graphs	53
KELAREV, A.V. and PRAEGER, C.E., On transitive Cayley graphs of groups and semigroups	59
BROWN, M.R., DE BEULE, J. and STORME, L., Maximal partial spreads of $T_2(\mathcal{O})$ and $T_3(\mathcal{O})$	73
VAN DAM, E.R. and FON-DER-FLAASS, D., Codes, graphs, and schemes from nonlinear functions	85
USTIMENKO, V.A. and WOLDAR, A.J., Extremal properties of regular and affine generalized m -gons as tactical configurations	99
TUAN, N.D., A note on block-transitive point-imprimitive designs	113
BOWMAN, D., BRADLEY, D.M. and RYOO, J.H., Some multi-set inclu- sions associated with shuffle convolutions and multiple zeta values	121
BEDFORD, D., JOHNSON, M. and OLLIS, M.A., Defining sets for Latin squares given that they are based on groups	129

Number 2

LUYCKX, D. and THAS, J.A., Derivation of m -systems	137
FIORINI, S., A combinatorial study of partial order polytopes	149

HIRAKI, A., A characterization of the doubled Grassmann graphs, the doubled Odd graphs, and the Odd graphs by strongly closed subgraphs	161
JOHNSON, K.W. and POIMENIDOU, E., Group characters, permutation actions and sharpness	173
RANSON, B.B. and DOVER, J.M., Blocking semiovals in $PG(2, 7)$ and beyond	183
BREŠAR, B., Intersection graphs of maximal hypercubes	195
DONATI, G. and DURANTE, N., Some subsets of the Hermitian curve	211
HSU, T., LOGAN, M.J., SHAHRIARI, S. and TOWSE, C., Partitioning the Boolean lattice into a minimal number of chains of relatively uniform size	219

Number 3

KRAFFT, O., PAHLINGS, H. and SCHAEFER, M., Diagonal-complete latin squares	229
ZHANG, L., ZHENG, H.-F. and SHUM, K.P., Combinatorial properties of codes with degree n	239
IWASAKI, S., Translations of the squares in a finite field and an infinite family of 3-designs	253
GOTTSCALK, H. and LEEMANS, D., Geometries for the group $PSL(3, 4)$	267
HEUBERGER, C. and PRODINGER, H., Carry propagation in signed digit representations	293
MIZUNO, H. and SATO, I., L -functions of regular coverings of graphs	321
LIU, W., The Chevalley groups $G_2(q)$ with q odd and $2 - (v, k, 1)$ designs	331
DRESS, A., KOOLEN, J.H. and MOULTON, V., Addendum	347

Number 4

HIRAKI, A., A distance-regular graph with bipartite geodetically closed subgraphs	349
BENDITO, E., CARMONA, Á. and ENCINAS, A.M., Solving Dirichlet and Poisson problems on graphs by means of equilibrium measures	365
DAMANIK, D. and LENZ, D., Powers in Sturmian sequences	377
CHOW, C.-O., On the Eulerian polynomials of type D	391

BROWN, M.R., Ovoids of $\text{PG}(3, q)$ stabilized by a central collineation	409
MERRIS, R., Split graphs	413
BOBEN, M. and PISANSKI, T., Polycyclic configurations	431

Number 5

CAUGHMAN, J.S. IV, The last subconstituent of a bipartite Q -polynomial distance-regular graph	459
VALENCIA, C.E. and VILLARREAL, R.H., Canonical modules of certain edge subrings	471
BONOLI, G. and MELONE, N., A characterization of Grassmann and attenuated spaces as $(0, \alpha)$ -geometries	489
KIM, D. and ZENG, J., Combinatorics of generalized Tchebycheff polynomials	499
GHINELLI, D. and PAYNE, S.E., The Ghinelli–Löwe construction of generalized quadrangles	511
BORNHÖFT, J., BRINKMANN, G. and GREINUS, J., Pentagon–hexagon-patches with short boundaries	517
GAO, W. and GEROLDINGER, A., Zero-sum problems and coverings by proper cosets	531
AHLWEDE, R., AYDINIAN, H. and KHACHATRIAN, L.H., More about shifting techniques	551
BREŠAR, B., KLAVŽAR, S. and ŠKREKOVSKI, R., Quasi-median graphs, their generalizations, and tree-like equalities	557
CURRIE, J.D. and SHELTON, R.O., The set of k -power free words over Σ is empty or perfect	573
KEMP, R., On the representation of simply generated trees by leftist trees	581

Number 6

LEE, K., The automorphism group of a linear space with the Rosenbloom–Tsfasman metric	607
IMBER, J.J.E. and WEHLAU, D.L., A family of small complete caps in $\mathbb{PG}(n, 2)$	613
ZHANG, X.-D., Graphs with fourth Laplacian eigenvalue less than two	617
DE BRUYN, B. and VANDECASTEELE, P., Two conjectures regarding dense near polygons with three points on each line	631

NEŠETŘIL, J. and SHELAH, S., On the order of countable graphs	649
MAGNIEN, C., Classes of lattices induced by chip firing (and sandpile) dynamics	665
IVANOV, A.A. and PASINI, A., A diameter bound for extensions of the $F_4(2)$ -building	685
SUN, Z.-W., Combinatorial identities in dual sequences	709
FENG, Y.-Q. and WANG, K., s -Regular cyclic coverings of the three-dimensional hypercube Q_3	719
DELANOTE, M., Point derivation of partial geometries	733
WILDBERGER, N.J., Minuscule posets from neighbourly graph sequences	741
REIFEGERSTE, A., On the diagram of 132-avoiding permutations	759

Number 7

MIKLAVIČ, Š. and POTOČNIK, P., Distance-regular circulants	777
BANG, S., KOOLEN, J.H. and MOULTON, V., A bound for the number of columns $\ell_{(c,a,b)}$ in the intersection array of a distance-regular graph .	785
BONISOLI, A. and RINALDI, G., Primitive collineation groups of ovals with a fixed point	797
THOMAS, H., Order-preserving maps from a poset to a chain, the order polytope, and the Todd class of the associated toric variety	809
DARTOIS, A., FIORENZI, F. and FRANCINI, P., Sandpile group on the graph \mathcal{D}_n of the dihedral group	815
INCITTI, F., The Bruhat order on the involutions of the hyperoctahedral group	825
CANGELMI, L., Factorizations of an n -cycle into two n -cycles	849
FRANCHI, C. and VSEMIRNOV, M., Min-wise independent groups	855
CHAOURLAR, B. and OXLEY, J., On series–parallel extensions of uniform matroids	877
CAMERON, P.J. and KU, C.Y., Intersecting families of permutations . . .	881
HAJIAGHAYI, M.T. and HAJIAGHAYI, M., A note on the bounded fragmentation property and its applications in network reliability	891
DU, S., WANG, F. and ZHANG, L., An infinite family of semisymmetric graphs constructed from affine geometries	897

BURICHENKO, V.P., On homological properties of locally polar spaces	903
VAN DER HOLST, H., Some connectivity properties for excluded minors of the graph invariant $\nu(G)$	929

Number 8

MIZUNO, H. and SATO, I., Bartholdi zeta functions of digraphs	947
CHEN, B. and LAU, M., On semi-Eulerian partially ordered sets with boundary	955
PAYNE, S.E. and THAS, K., Notes on elation generalized quadrangles	969
TAN, B. and WEN, Z.-Y., Invertible substitutions and Sturmian sequences	983
SUROWSKI, D.B. and SCHROEDER, W.C., Homological methods in algebraic map theory	1003
SCHROEDER, W.C. and SUROWSKI, D.B., Regular cyclic coverings of regular affine maps	1045
CORDOVIL, R. and FORGE, D., A note on Tutte polynomials and Orlik– Solomon algebras	1081
LAHOUAR, H., Fonctions de partitions à parité périodique	1089
LEMO, M. and OXLEY, J., On the minor-minimal 3-connected matroids having a fixed minor	1097
